Summary

Full-stack software developer with 2 years of experience building scalable and maintainable web applications using modern technologies such as React, NestJS, and .NET. Skilled in SQL and NoSQL databases, and experienced in agile environments collaborating closely with designers and engineers to deliver user-focused solutions on time.

Experience

Fruno
Río Segundo, Alajuela - Hybrid March 2026 - Present
Full-Stack Developer

- Integrated external systems through APIs and RPA bots for legacy platforms.
- Built reporting modules for sales and core business processes, and automated existing reports by developing optimized database views and queries.
- Developed new features for a system undergoing migration, analyzing the legacy platform to identify improvement opportunities.
- Automated business processes using Python and Playwright RPA bots, saving over 4 hours of manual work per day.
- Created scheduled jobs to generate reports and synchronize data across systems
- Developed new API endpoints to meet business and customer requirements.
- Deployed and maintained web applications across testing and production environments.
- Implemented two-factor authentication (2FA) for the core system.
- Refactored the existing security implementation to address identified vulnerabilities.

AF Seguros
Tibas, San Jose - Remote June 2024 - March 2026
Full-Stack Developer for AF Platform, AF Website

- Built and maintained new features and functionalities for internal platforms and client-facing websites using React and Firebase.
- Participated in Scrum ceremonies and customer meetings to gather requirements and ensure proper alignment with business needs.
- Optimized database queries to reduce costs and keep Firebase billing within the expected range.
- Translated Figma designs into responsive, functional, and high-performance applications.
- Implemented vector-based animations in collaboration with designers to improve user experience.
- Automated deployments to Firebase Hosting and Functions using Github Actions with unit testing and e2e with Playwright.

- Created and maintained SharePoint sites with Power Automate workflows to streamline business processes and improve team collaboration
- Integrated third-party services and external APIs, including Brevo and the OpenAI API.

Colegio Técnico Profesional de Hojancha
Hojancha, Guanacaste - Remote
Full-Stack Developer June 2024 - December 2024

- Built new features for the enrollment system, developing both the frontend in React and the backend in NestJS.
- Integrated real-time communication to handle changes in course section capacity.
- Participated in requirements gathering and progress discussions directly with the customer.
- Delivered the project using Docker for deployment and containerization.

Coopepilangosta RL -Universidad Nacional
Online Sales System for Coopepilangosta R.L
Hojancha, Guanacaste - Remote
Full-Stack Developer March 2022 - April 2023

- Contributed to the development of new features for an e-commerce platform, adapting to specific business use cases and requirements.
- Implemented design patterns in a .NET REST API to deliver scalable and high-quality solutions.
- Participated in customer communication to gather requirements and provide progress updates.
- Collaborated with the development team under Scrum methodology to integrate new functionalities effectively.

Education

Bachelor's Degree in Information Systems Engineering

Universidad Nacional de Costa Rica
2020 - 2025

Skills

Languages: JavaScript, TypeScript, C#, Python, SQL
Frameworks & Libraries: React, NestJS, .NET, Redux, Material UI, Bootstrap, Vite
Databases: SQL Server, MySQL, MongoDB, Firebase
DevOps & Tools: Git, GitHub, GitHub Actions, Bitbucket, Docker, Playwright, Postman, Figma, Power Automate, SharePoint
Concepts: REST APIs, JWT, 2FA, WebSockets, design patterns, caching, Scru**m**
Spoken languages: Spanish (native), English (B2 – upper intermediate)
